SUMMARY

Detail-oriented and analytical IT professional with a strong interest in data-driven problem solving and a solid foundation in data analysis techniques. Skilled in organizing, cleaning, and interpreting data to support better decision-making. Eager to contribute to a tech-focused team where I can apply my current skills while continuing to grow into a data analyst role.

WORK EXPERIENCE

Data intern
BrightPath initiative - Non-profit
Remote | May 2024 - June 2024

- Cleaned and structured youth program data to ensure accurate reporting and better insight into participant engagement levels.
- Designed and maintained visual dashboards using spreadsheets to track trends in attendance, feedback, and overall program performance.
- Wrote simple queries to extract data from internal sources, supporting the creation of monthly reports for team discussions and planning.
- Assisted in digitizing paper records and worked with program staff to identify important data points that could guide future improvements.

Personal tutor
Damelin College, Cape town, South Africa
October 2023 - March 2023

- Served as a Personal Tutor in Programming, delivering customised instruction and support.
- Created personalised lesson plans and adapted teaching strategies to assist students in mastering programming languages and concepts.
- Monitored student progress and provided ongoing feedback to improve understanding and boost confidence in coding skills.
